INSIGHTS

Late Deliveries Are a Client Risk

- 55.67% on-time rate — nearly half of all loads delivered late

28 Trucks Sitting Idle

- Only 92/120 active — significant unrealized revenue and ongoing fixed costs

Over-Reliance on Top 3 Lanes

- Charlotte →Portland, Seattle →Charlotte and Columbus →Portland each exceed \$10.9M

Two High-Value Customers Are Inactive

- XYZ Foods (\$1.54M) and Metro Group (\$1.52M) are both inactive — ~\$3M at risk

Idle Time is Burning Millions

- Drivers idle 7hrs/trip on average — 28% of drive time wasted, fuel spend at \$95.59M

Aging Trucks Are Disproportionately Expensive

- Top maintenance trucks have accumulated \$70K–\$90K each, mostly 2015–2018 models

Dallas Terminal is a Safety Hotspot

- Highest claims at \$276K — nearly 3x Chicago's \$102K

~\$1M Spent on Preventable Incidents

- 64 preventable incidents × \$15,610 avg claim = ~\$999K in avoidable costs

RECOMMENDATIONS

Prioritize Indiana and California corridors, introduce delivery SLAs into customer contracts

Retire high-cost units like TRK00003, redeploy or lease out roadworthy idle trucks

Negotiate volume commitments on mid-tier lanes to reduce single-lane dependency

Assign account managers to re-engage both customers immediately

Install telematics idle monitoring, enforce a 3hr maximum idle limit per trip

Set a \$50K annual maintenance threshold — any truck exceeding it triggers a retire-or-replace review

Immediate safety audit of Dallas, mandatory defensive driving retraining within 30 days

Flag drivers with 2+ preventable incidents for coaching — prioritize David Miller (7) and Charles Hernandez (6)

The background features a dark blue-grey field with abstract, overlapping geometric shapes in various shades of green and yellow-green on the right side, creating a modern, layered effect.

THANK YOU
